

The New **Volkswagen** e-Golf

Frontend Development Project

Company: BlueSky Interactive
By: Bahar Saghafi

Volkswagen

New Volkswagen e-Golf

Landing-Page

Requirement Gathering

- what the goal of the project is;
- who the target audience is;
- how they will use the product.

To get started, I gathered information and photos about the e-Golf and checked some websites about Volkswagen and other cars to get an idea.

Creating Prototype

A prototype for an early version of the future web page. It demonstrates a basic idea of what the app will look like and how it will work.

Development

- develops user-facing features;
- builds reusable code for future use;
- ensures the technical feasibility of UI/UX design;

Browser Testing & W3C Validating

Browser testing ensures a website functions consistently across different web browsers. W3C validation checks if a website's code aligns with industry standards for optimal performance and accessibility.

Programming Languages, Frameworks & Libraries

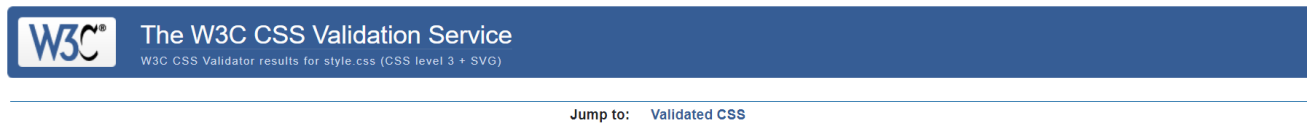

Development steps

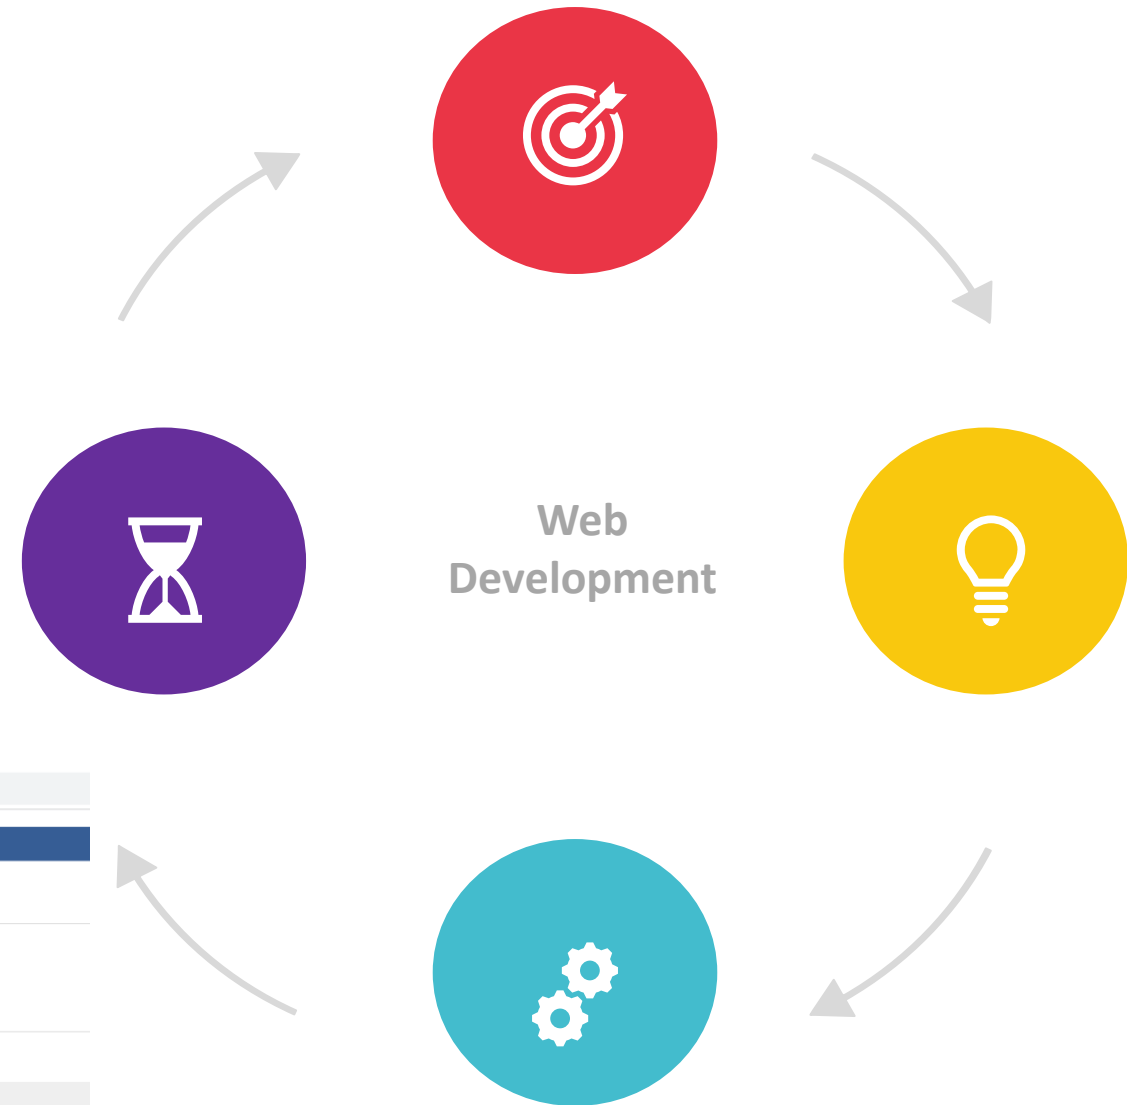

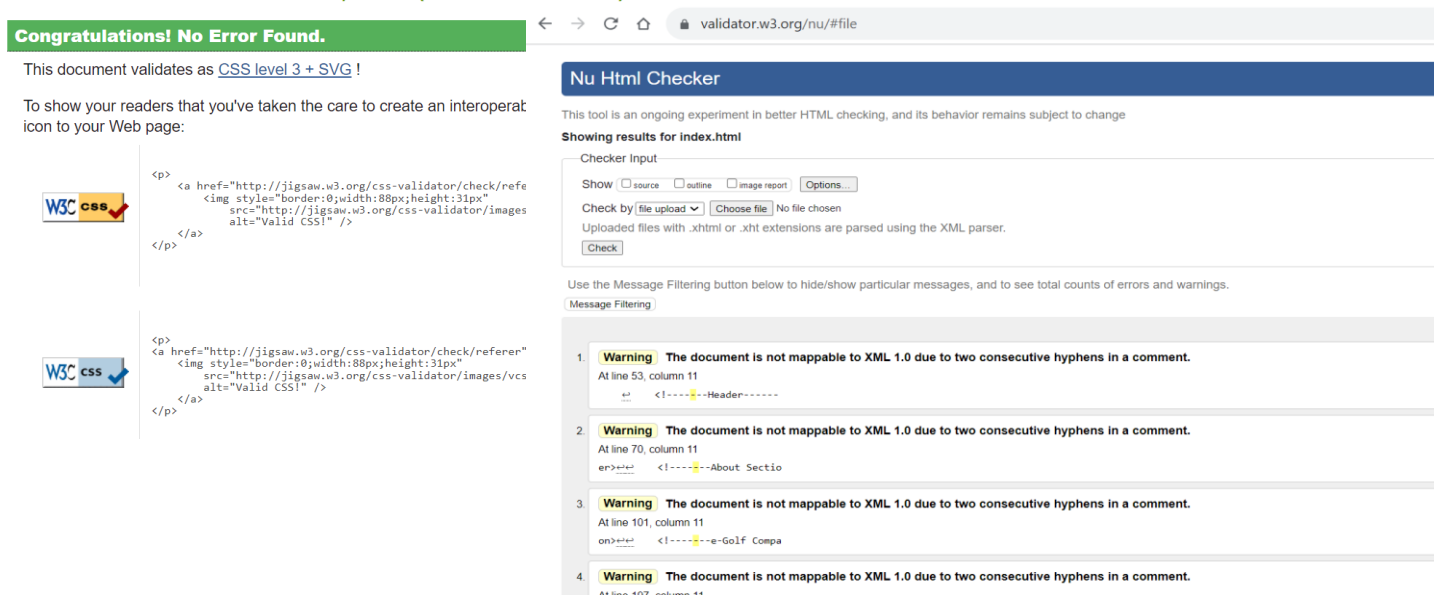

W3C Validation

1. Standards Compliance
2. Accessibility Enhancement
3. Cross-Browser Consistency
4. SEO Improvement
5. Future-Proofing
6. Debugging and Maintenance

W3C CSS Validator results for style.css (CSS level 3 + SVG)

P.S. I usually have no errors or small errors because I focus on writing clean code 😊
